European Energy Venture Fair
8th and 9th September 2010
Zurich, Switzerland

Event Partners and Sponsorship

Dear Colleagues

The European Energy Venture Fair 2009 was an enormous success and we again thank those Partners and Sponsors who made it possible.

We are now rapidly preparing for EEVF 2010 and wish to highlight to you the partnership and sponsorship opportunities that this event offers your organisation. The event will take place on September 8th and 9th, 2010.

Best Regards

Gina Domanig

Partners

Sponsors

Partnership

The number of event Partnerships is limited; ten partners have already confirmed leaving opportunities for only one or two new partners in 2010.

Active participation in the organisation of plenary sessions is encouraged and there is always an opportunity for a partner to introduce one of the conference sessions.

Michael Stuer Lauridsen, Partner, Bankinvest New Energy Solutions

New Partnership (10,000 €, discount for subsequent years), attracts the following benefits:

- The reputation as organizing party and Partner of the EEVF 2010
- Three free entry tickets (only people of organization not friends/partners etc)
- Two entries in the brochure: description of organization (1 complete page including biography) and mentioned again in the agenda (for partners organizing sessions)
- Short introduction (2 min.) of organization as introduction to the organized session
- Priority introduction of organization at the gala dinner
- Presentation of brochures and information at the partner's table
- Logo of partners presented on the pillar at the event entrance and in the forum hall
- Logo of organization and referral to the representing person by the moderator (several times during event, slide with logos starts and ends sessions)
- Partnership discount in subsequent years.

Sponsors

Networking is one of the prime goals of the event. The exclusive sponsorship of one of the breakout or refreshment events is a powerful marketing tool and supports the cost of the high quality of catering provided at the Rüschlikon Centre.

Sponsorship is limited to eight companies and six Sponsors have already confirmed.

Sponsorship (6,000 €), attracts the following benefits:

- Two free entry ticket (only people of organization not friends/partners etc)
- Mentioned two times in the brochure: description of organization (1/2 page) and mentioned in the agenda as event sponsor (e.g. XY cocktail)
- Presentation of organization at the gala dinner
- Presentation of brochures and information at the sponsors table
- Logo on tabloids at the location (e.g. on the bar)

This will mark the ninth conference initiated by energy investors for energy investors. The goals for EEVF 2010 are to discuss important topics in the energy investment sector, to facilitate investments and to meet with high potential start-up companies.

The European Energy Venture Fair is a non-profit event and in 2005 it donated 20,000 € to a regional wind energy centre in Madagascar (www.madeole.org), in 2006 it donated 7,000 € to Bertrand Piccard's Solar Impulse flight project (www.solarimpulse.com), in each 2007 and 2008 it donated 10,000 € to the ADRES Solar Cooker Project and a rural electrification project in Madagascar and in 2009 it donated 10,000 € to the Solar Energy Foundation, a charitable organisation based in Germany (www.stiftung-solarenergie.de).

The 2009 conference was attended by over 150 venture capital investment professionals from more than 95 funds.
